Hi Denise,

Thank you very much for your follow up on this issue, much appreciated. With your approval, CDM can go ahead subcontract out those samples.

Thanks again.

**Importance:** High

Hi, Michael!

hope you are well!

We need these samples (see message below from Susan Schofield) go to a subcontract lab due to the quick TAT so we can make decisions on the field. These samples were approved in the workplan for this site.

Please let me know if you need additional info.

Thanks,

Denise

Buenos días Denise,

Can you please approve for these VOC samples to be collected the week of August 19 to go to the subcontract laboratory, as per the work plan? We need 24 hour turnaround for emailed results so we can use the results to plan the depths for the ports in the bedrock well.

Thanks,

Susan

**Subject:** Analytical Request\_Cabo Rojo \_8/12/13

Adly,

Attached is the lab request for the upcoming sampling event for VOC analysis at the Cabo Rojo

Groundwater Contamination Site located in Cabo Rojo, PR. Sampling is scheduled to occur between August 12 and August 23, 2013. Please note that we are requesting 24 hours turnaround time from shipping, not receipt at the lab. These samples were approved to go to the subcontract laboratory when EPA approved the CDM Smith work plan. The samples are wireline samples to be collected from supply wells or new bedrock monitoring wells. Please let us know if the RPM will need to send an email indicating this.

Please feel free to contact me with any questions.

Thanks in advance.

**Vanessa Macwan**
